

## I lost my Skinhibitions™...

"I felt when people looked at me, they only saw my acne scars. I've had two pain-free treatments with Sublative®. My skin is smoother and more filled out, and it has a natural glow. I am now more confident and feel that people are focusing on the real me."

— **Katelyn B.**

"Sublative is a 'go-to' treatment in my practice for acne scars. It is a comfortable procedure with little downtime. My patients see improvements after one or two treatments, and everyone in my practice loves seeing the change in the patients' self-image and confidence."

— **Michael Gold, M.D.**  
Gold Skin Care Center  
Tennessee Clinical Research Center

"Sublative has been highly effective for wrinkle reduction and treating acne scars. Due to its unique use of fractionated bipolar radio frequency (RF) technology, there is minimal risk to the surface of the skin, making the Sublative treatment safe for use in all skin types."

— **Stephen W. Eubanks, M.D.**  
Dermatology & Laser Center at Harvard Park

INTRODUCING

# Sublative®

Professional Skin Rejuvenation  
+ Acne Scar Treatment

## Lose Your Skinhibitions.

For many of us, skin imperfections can impact self-confidence. Often, people considering facial rejuvenation procedures are inhibited by high cost, pain, downtime and side effects. Sublative skin treatments are an ideal solution! Sublative effectively targets the skin's imperfections while offering the following advantages:

- Effective treatment for wrinkles and acne scars
- Treatment in less than an hour
- Minimal downtime
- Affordable
- Comfortable, non-surgical procedure
- Safe and effective on all skin types

## Impressive results.

Sublative® treatments provide the results you desire without the worry of more invasive procedures. Sublative penetrates more deeply than creams and peels, and addresses your skin's overall tone and texture more effectively than injectables. And while results with more invasive procedures may be dramatic, few are willing to incur the cost or risk. Sublative restores a youthful glow and smooths the texture of the skin without the pain and downtime associated with a needle or a knife.

**Non-professional**  
Lotions, masks and peels

- Minimal results
- No impact below surface
- No downtime

---

**Injectables**  
Toxins and fillers

- Only treat wrinkles
- Minimal downtime

---

**Sublative®**  
Professional Rejuvenation Treatment

- Improves wrinkles, tone and texture
- Minimal downtime

**Invasive**  
Laser and surgical procedures

- Can produce most dramatic results
- Significant downtime

## Sublative® works differently.

Sublative is neither laser- nor light-based. Instead, this one-of-a-kind technology uses fractionated bi-polar radio frequency (RF), precisely directed to the skin in the form of a matrix. Healthy skin around the matrix dots accelerates the healing process. Post treatment, new collagen and healthy skin cells are produced, reducing acne scars, mild to moderate wrinkles and superficial skin discolorations while creating smoother and more elastic skin texture.

For best results, expect 3 treatments, 4-6 weeks apart. The total number of sessions depends on your skin's condition.

Some patients report a warm, prickly sensation as energy enters their skin. Following treatment, a pink or red flush resembling a minor sunburn is common. Topical anesthetic ointments and cooling gels may be used to reduce discomfort during treatment.

## Patient Results

### Wrinkles
